

Quick-Stop Culvert Plugs

PROACTIVE ENVIRONMENTAL RESPONSE PRODUCTS

Proactive Environmental is pleased to present our in-house built pneumatic culvert plugs. The product is manufactured from a durable, 22 oz. PVC, this provides dependability and allows for reuse. Complete with both a schrader valve and 3/4" one-way valve, deployment is quick and easy with the use of any style air pump and chuck set up. A relief valve set to 4psi ensures no damage will occur due to over inflation. Quick-Stop Culvert Plugs come in standard culvert diameters such as 18", 30", 48" or custom sizes as needed. Custom culvert plug kits are also available featuring multiple plugs, pneumatic foot pump, and a hard or soft shelled storage case.

- Quick to Deploy
- Durable & Reusable
- Multiple Sizes

Recover – Clean – Treat
