

Water Gate® Barriers

PROACTIVE ENVIRONMENTAL RESPONSE PRODUCTS

Proactive is pleased to be the Western Canadian distributor of Water Gate® Barriers and accessories. This product is designed for oil spill response, flood mitigation, isolation and water supply. Water gates are made of a polyester fabric coated with ultra-robust PVC with some models having release ports to moderate water flow. The anti-mining bib helps avoid river bed erosion while providing for rapid damming of waterbodies for the purposes of free product containment and recovery, protection or pumping.

Applications include:

- Portable underflow dams
- Fire water supply
- Flood protection
- Cofferdams

Recover – Clean – Treat
